

# Foldable Nesting Mesh Roll Container Trolley

This foldable, nesting mesh roll container trolley is designed for use in supermarkets and warehouses. The trolley is constructed of durable metal and features smooth-rolling casters.

## Product Overview

### Versatile Warehouse Solution

This foldable nesting mesh roll container trolley is designed to provide maximum flexibility for your warehouse operations. Its collapsible design allows for compact storage when not in use, helping you save valuable floor space during seasonal fluctuations. Built to keep consignments secure and organized, this trolley is an ideal solution for protecting sensitive goods while streamlining your logistics and transport processes.

## Key Features

### Core Functionalities

- Collapsible design for space-saving storage
- Nesting capability for efficient warehouse footprint management
- Secure containment for sensitive goods
- Flexible adaptation for changing product ranges
- Customizable design options available based on real usage

### Ideal Environments

Supermarket, Warehouse, Retail, Logistics

## Construction

Material	Durable Metal
