Product Overview

Portable Power Solution

The Foldable Portable Solar Charger is engineered for reliability in outdoor environments, featuring high-efficiency monocrystalline silicon cells. Its intelligent voltage stabilization technology ensures safe and stable output for your electronic devices, including smartphones, tablets, and energy storage systems. With a durable, waterproof, and temperature-resistant carbon fiber construction, this portable unit is the perfect companion for camping, hiking, and remote field work.

Technical Specifications

Output Ports

- 2 x USB Ports (5V)
- 1 x DC Port (12V)

Panel Material

Monocrystalline Silicon

Safety & Features

Protection Mechanisms

Over-current protection, Short-circuit protection, Overcharge protection, Voltage stabilization

Design & Durability

Environmental Resilience

Waterproof • Corrosion-resistant • Temperature-resistant

Design Highlights

- Foldable design for easy transport
- Carbon fiber material
- Integrated magnetic handle
- Includes soft storage bag
