

Foldable Rectangular Lens Magnifying Glass

This magnifying glass is designed with a rectangular lens for detailed observation and inspection. It features a foldable handle and durable construction, ideal for scientific, educational, and hobbyist applications.

Product Overview

Professional Inspection Tool

This foldable rectangular lens magnifying glass is part of a specialized Austrian instrument series designed for high-precision tasks. Its rectangular lens frame offers an expanded field of view, making it an ideal choice for detailed observation and inspection. The foldable handle design ensures portability and ease of storage, suitable for scientific, educational, and hobbyist applications.
