

Foldable Roadside Warning Triangle

The foldable warning triangle is designed for roadside safety. It is constructed from durable red plastic with reflective strips for enhanced visibility.

Product Overview

Roadside Safety Warning Triangle

This foldable warning triangle is an essential safety device designed to alert other drivers to a disabled vehicle on the road. Constructed from durable, high-visibility red plastic with reflective strips, it ensures maximum awareness in both daylight and low-light conditions. The unit features a stable, foldable base that allows for quick deployment during emergencies and compact storage when not in use.
