

Folding Access Stairs for Elevated Platforms

Industrial-grade folding stairs provide safe access to elevated platforms. The durable metal construction features a self-leveling tread design and handrails.

Product Overview

Industrial Access Solution

These industrial-grade folding stairs are engineered to provide safe and efficient access to elevated platforms. Featuring a robust metal construction with a galvanized finish, they offer exceptional corrosion resistance for demanding environments. Designed with user safety in mind, they include self-leveling treads and integrated handrails, while the compact folding mechanism ensures easy storage and transport when not in use.

Technical Specifications

Material	Durable Metal
Surface Finish	Galvanized

Safety & Features

Key Features	Self-leveling treads, Integrated handrails, Corrosion resistant, Folding mechanism
--------------	--

Applications

Recommended Environments

- Warehouses
- Loading docks
- Elevated platforms
