

Folding Aluminum Mountain Bike

This folding mountain bike features a special high-strength aluminum alloy main frame. Patented Fusion and V-Clamp technology ensures a secure lock, while the RST self-locking, adjustable suspension fork enhances comfort on bumpy roads.

Product Overview

Versatile Folding Mountain Bike

This 26-inch folding mountain bike is engineered for both urban commuting and trail adventures. Featuring a lightweight alloy frame and a convenient folding mechanism, it offers an ideal balance of portability, strength, and storage efficiency. Equipped with front suspension, disc brakes, and a reliable drivetrain, it provides a capable and comfortable riding experience across varied terrains.
