

Folding Bicycle with Aluminum Alloy Frame

This folding bicycle is constructed with a high-strength 6061 aluminum alloy frame. It features alloy V-brakes and Kenda tires.

Product Overview

Compact Urban Mobility

This folding bicycle is meticulously engineered for urban commuters who prioritize portability and efficiency. Featuring a lightweight aluminum alloy frame, it offers a seamless blend of durability and ease of handling for daily city transit. Its intuitive folding mechanism ensures it can be stored effortlessly in limited spaces, making it the perfect solution for apartment dwellers and multimodal commuters.
