

Folding Disc Harrow 4.5m

The 1BZ-4.5 disc harrow is a folding type primarily used for cleaning stubble before tillage. It can also crush clods after tillage on uncultivated land and in heavy clay soil fields, serving as a plough for primary tillage in dry fields.

Product Overview

Professional Folding Disc Harrow

The 1BZ-4.5 folding disc harrow is a high-capacity implement designed for efficient soil preparation in large-scale agricultural operations. It serves multiple functions, from clearing plant stubble and crushing clods to primary tillage in dry fields and working heavy clay soils. Featuring a robust folding design and hydraulic transport wheels, this harrow combines heavy-duty performance with ease of maneuverability and storage.

Technical Specifications

Working Width	4.5 m
Design Type	Folding
Transport Features	Hydraulic Rubber Wheels, Folding Frame

Applications & Use

Primary Applications

- Stubble cleaning
- Clod crushing
- Primary tillage
- Heavy clay soil preparation

Soil Compatibility

Uncultivated Land • Sticky Heavy Clay • Dry Cultivated Fields
