Product Overview

Compact & Durable Transport Solution

This folding hand trolley is engineered for efficiency and portability, featuring a robust steel frame combined with an aluminum toeplate for optimal strength-to-weight ratio. Its telescoping handle and collapsible design allow it to fold down to a mere 6cm thickness, making it perfect for storage in tight spaces or vehicles. With a 90kg load capacity and smooth-rolling double-bearing wheels, it provides reliable performance for moving boxes, luggage, and equipment in professional or personal settings.
