

Folding Mountain Bike with Aluminum Alloy Frame

This folding mountain bike features a special high-strength aluminum alloy main frame with a water mark. Patented Fusion and V-Clamp technology ensures a secure lock.

Overview

High-Performance Folding Mountain Bike

This high-performance mountain sports bike is engineered for both versatility and rugged performance. Featuring a durable aluminum alloy frame and a delicate suspension system, it ensures a comfortable and fast ride across various terrains. Its folding design makes it an ideal choice for commuters and adventurers who need convenient storage and transportation without sacrificing off-road capability.

Key Features

Frame Material	Aluminum Alloy
Suspension System	Full Suspension
Braking System	Disc Brakes
Terrain Suitability	Rough Roads, Mountain Trails, Urban Commuting

Design & Utility

Performance Highlights

- Lightweight aluminum alloy frame construction
- Advanced suspension for vibration dampening
- Reliable stopping power in all weather conditions
- Compact folding design for easy storage

Folding Mechanism	Yes
