

Folding Pruning Saw with Curved Blade

The folding pruning saw is designed for efficient branch trimming and pruning. Its curved blade effortlessly cuts through branches, while the folding design ensures safe storage and portability.

Product Overview

Compact Professional Pruning Solution

This folding pruning saw is a versatile tool engineered for efficient branch trimming and maintenance tasks. Featuring a curved, high-quality steel blade with aggressive teeth, it delivers reliable performance on branches up to several inches in diameter. Its ergonomic design and secure locking mechanism ensure user safety and comfort, making it an essential implement for professional landscapers and garden enthusiasts alike.

Technical Specifications

Blade Material	High-quality steel
Blade Profile	Curved with aggressive teeth

Design & Ergonomics

Primary Applications

- Professional landscaping
- Branch trimming
- General gardening

Key Features	Folding Design, Ergonomic Grip, Safety Locking Mechanism, Compact Portability
