

Folding Steel Platform Hand Truck

This robust hand truck is made from high-strength steel for exceptional durability and load-bearing capacity. The folding design allows convenient storage, and the non-slip platform and smooth-rolling casters ensure easy maneuverability.

Product Overview

Robust Material Handling

The YB300A Steel Hand Truck is a high-strength, durable solution engineered for demanding industrial and commercial environments. Its smart folding design provides maximum space efficiency for storage and transportation, while the non-slip platform ensures your cargo remains secure. Designed for smooth maneuverability, this versatile hand truck is an ideal asset for warehouses, workshops, and delivery operations.

Technical Specifications

Recommended Applications

- Warehouses
- Workshops
- Delivery services

Material	High-strength steel
Surface Finish	Non-slip texture
Key Features	Folding Design, Smooth-rolling Casters, High Load-bearing Capacity
