

# Folding Table for Garment and Shoe Manufacturing

This folding table is designed for use in garment, shoes, and accessories manufacturing. The folding mechanism allows for convenient storage and transport, making it ideal for flexible production environments.

## Product Overview

### Versatile Manufacturing Folding Table

This large, rectangular folding table is specifically engineered for the demanding environments of garment, shoe, and accessory manufacturing. Its robust design features a durable, flat surface supported by a reinforced metal frame with multiple legs and horizontal supports, ensuring exceptional stability during heavy use. The integrated folding mechanism provides significant flexibility, allowing for easy storage and transport in dynamic production spaces, making it an ideal solution for cutting, assembling, and quality inspection tasks.

## Design & Construction

Table Type	Folding Table
Frame Material	Reinforced Metal
Structural Features	Folding Mechanism, Horizontal Supports, Multi-leg Design

## Application

### Industry Application

Garment Manufacturing • Shoe Production • Accessories Manufacturing

### Operational Tasks

- Material Cutting
- Assembly
- Quality Inspection
