

Food and Beverage Transfer Scoop with Dual Handles

This tool is designed for transferring granular or particulate food products. It features a wide, angled scoop and two ergonomic handles for a secure grip and controlled dispensing.

Product Overview

Designed for Efficiency and Hygiene

This specialized transfer scoop is engineered for the seamless handling of granular and particulate food products in professional processing environments. Featuring a dual-handle design, it ensures optimal control and balance during heavy-duty material transfers. Its smooth, non-porous construction prioritizes sanitation, making it an essential tool for maintaining strict hygiene standards in food and beverage facilities.

Design & Construction

Primary Application

Food Processing • Granular Transfer • Particulate Handling

Material Characteristics

Food-Grade, Non-Porous, Smooth Surface

Handle Type

Dual Ergonomic Handles
