Product Overview

Efficient Food Dehydration

This 8L food dehydrating oven is designed for efficient and consistent food preservation in a compact footprint. Featuring a convection fan and stainless steel heating element, it ensures even drying for fruits, vegetables, and snacks. With user-friendly temperature and timer controls, this unit is an ideal solution for home kitchens seeking healthy, long-lasting food storage options.

Technical Specifications

Performance Metrics

330 W

Power Output

8 L

Capacity

78 °C

Max Temperature

Design Features

- Single tempered glass door
- Black door handle
- Convection fan
- Stainless steel heating element

Controls

- 2 control knobs
- 12 hours timer
- 48-78°C temperature control

Electrical Requirements

220-240V~ 50/60Hz
