Overview

Efficient Food Preservation

This digital food dehydrator is designed for consistent, efficient drying of fruits, vegetables, herbs, and meats. Featuring a hot air circulation system and a transparent monitoring door, it ensures even heat distribution across its 6 BPA-free trays. The digital touch panel allows for precise control over temperature and drying times, making it an ideal solution for creating healthy snacks.

Technical Specifications

Power Rating

450 W

Minimum Power

500 W

Maximum Power

Voltage

100-240V, 50/60Hz

Temperature Range

104° F to 167° F (30°C to 80°C)

Design & Build

Monitoring

- Transparent observation door
- Digital touch control panel
- Real-time temperature display
- Remaining time display

Drying Trays

6 layers

Material Safety

BPA Free, Food Grade

Safety & Operation

Safety Features

Overheat Protection • Automatic Shut-off

Suitable For

Fruits, Vegetables, Herbs, Meat, Yogurt
