

Food Preparation Blender

This high-performance blender is designed for efficient food processing. It is available in two models, one with a plastic jar and the other with a glass jar, both featuring a chrome-finished base and intuitive controls.

Product Overview

High-Performance Food Preparation

These professional-grade blenders are engineered for efficient food processing in commercial and culinary environments. Featuring a sleek, chrome-finished base with intuitive button controls, they offer precise blending speeds and a pulse function for consistent results. Available in two distinct configurations, these units are ideal for preparing smoothies, soups, and sauces with ease.

Model Variants

- BL-326E (Plastic Jar)
- BL-326EG (Glass Jar)
