Overview

Universal Electric Motor for Food Processing

This universal electric motor is engineered for reliability and consistent performance in demanding food processing environments, such as bread machines and ice cream makers. It features a compact, cost-effective design with integrated temperature protection to ensure operational safety. With customizable installation dimensions and performance profiles, this motor is an adaptable solution for various household appliance manufacturers.

Key Advantages

Compact Structure • Low Cost • Temperature Protection • Reliable Operation

Application Fields

Bread Machines, Ice Cream Machines, Food Processing Equipment

Technical Specifications

Model Performance Comparison

Model	Voltage (V)	Power (W)	Start Torque (N.m)	Max Torque (N.m)
YFH-30L	100	30	0.25	0.43
YFH-50	100	50	0.35	0.66
YFH-80L	100	80	0.52	0.96
YXQ-90EI	220~240	90	0.5	1
YFH-200L	100	200	0.8	1.55

Operating Frequency

- 50Hz
- 60Hz
