

Foot Operated Air Pump

This foot-operated air pump is a compact and portable solution for inflating tires, sports equipment, and other inflatable items. Featuring a durable metal frame and a non-slip foot pedal, it provides efficient and effortless inflation.

Product Overview

Compact & Durable Inflation Solution

This foot-operated air pump provides a robust and portable solution for inflating tires, sports equipment, and various inflatable items. Engineered with a durable metal frame and a non-slip foot pedal, it ensures efficient and effortless operation for the user. The unit's folding design allows for convenient storage and transportation, making it an ideal tool for both home maintenance and on-the-go requirements.

Technical Specifications

Design Features	Compact, Portable, Folding Design, Non-slip Pedal
