

Foot Operated Air Pump with Gauge

This compact foot-operated air pump features an integrated pressure gauge. It has a durable construction, flexible air hose, and stable base for inflating tires and other inflatable items.

Overview

Compact Performance

This durable foot-operated air pump is designed for efficient, hands-free inflation of tires and various inflatable items. Featuring a sturdy, stable base and a flexible air hose, it ensures reliable operation in demanding environments. The integrated pressure gauge provides precise readings, allowing users to achieve optimal inflation levels with ease.
