

# Foot Operated Film Sealing Machine

This foot-operated film sealing machine is designed for sealing plastic films and bags. It features adjustable temperature control for various film thicknesses.

## Overview

### Professional Foot-Operated Sealing Solution

This foot-operated film sealing machine is engineered for efficient and reliable sealing of plastic films and bags. Designed with a durable metal frame and a convenient foot pedal, it allows for hands-free operation to maximize productivity. The adjustable temperature control ensures compatibility with various film thicknesses, making it an ideal choice for packaging applications across food, pharmaceutical, and industrial sectors.

## Technical Details

### Key Features

- Adjustable temperature control
- Hands-free foot pedal operation
- Durable metal frame construction

Model

FR-500

Operation

Foot-operated

## Applications

Suitable Industries

Food Packaging, Pharmaceutical, General Industrial
