

Foot Operated Oil Dispensing Pump

This foot-operated oil pump efficiently dispenses lubricants. Its wheeled base allows easy movement in industrial and automotive environments.

Overview

Efficient Lubrication Solution

This foot-operated oil dispensing pump is designed for reliable and efficient lubrication in industrial and automotive environments. Featuring a robust cylindrical reservoir and a convenient foot pedal for hands-free actuation, it streamlines the dispensing process. Mounted on a wheeled base, the unit offers excellent portability, allowing users to move the pump easily between workstations.

Design & Features

Included Components

- Cylindrical reservoir
- Foot pedal
- Dispensing hose
- Nozzle
- Wheeled base

Operation Method	Foot-operated
Portability	Yes
Mobility Features	Wheeled base, Portable

Applications

Suitable Applications

Industrial • Automotive • Lubricant Dispensing
