Overview

High-Efficiency Foot Operated Sealing

This foot-operated sealing machine utilizes advanced electrical pulse technology to achieve rapid sealing times of just 0.2 seconds, significantly boosting productivity compared to traditional methods. Designed for versatility, it is suitable for sealing various materials including aluminum foil, plastic films, and compound bags. It serves as an ideal, low-investment solution for industries ranging from food and pharmaceuticals to cosmetics and daily chemicals.

Performance

Sealing Time

0.2 s

Sealing Duration

Compatible Materials

Aluminum Foil, Plastic Film, Compound Bags

Operational Details

Target Industries

- Food Processing
- Pharmaceuticals
- Cosmetics
- Daily Chemicals
- Pesticides
- Lubricating Oil

Safety & Operation Guidelines

Guideline

Keep hands clear during operation to avoid scalding.

Turn heat adjustment knob anticlockwise to minimum when stopping.

Ensure bag mouth is flat to prevent foreign matter entry.

Heating wire ends should not exceed 2mm length.

Adjust temperature gradually from low to high to protect components.

Features

Key Features

Adjustable Heating Time • Hands-Free Operation • Electrical Pulse Technology • Low Investment • Simple Operation
