

Foot Operated Tire Inflator

This high-pressure foot pump is designed for inflating tires and other inflatable items. It features a foot-operated bellows system for efficient air compression, a pressure gauge for accurate inflation, and a versatile nozzle adapter for compatibility with various valve types.

Product Overview

High-Pressure Foot-Operated Inflator

This high-pressure foot pump is engineered for efficient tire inflation and general-purpose pneumatic tasks. Featuring a robust bellows system, it allows for reliable air compression without the need for electricity. The integrated pressure gauge ensures accurate inflation, making it a versatile tool suitable for both professional workshop environments and home maintenance.
