

# Forged Carbon Steel Pipe Fittings for HVAC&R

Forged carbon steel fittings are designed for HVAC&R piping systems. They offer exceptional strength, durability, and corrosion resistance, ensuring reliable performance in demanding applications.

## Product Overview

### High-Performance Forged Steel Fittings

These forged carbon steel pipe fittings are engineered to provide exceptional strength, durability, and corrosion resistance for demanding HVAC&R piping systems. Designed for secure, leak-free connections, they are suitable for a wide range of industrial applications. The fittings are precision-manufactured to meet rigorous international standards, ensuring reliable performance in refrigeration, air conditioning, and heating environments.

## Technical Standards

### Manufacturing Standards

ANSI B16.11, DIN, EN, JIS

## Product Details

### Available Fitting Types

- Elbows
- Tees
- Couplings
- Nipples
- Hex-plugs
- Unions
- Bushings
- Caps
- Outlets

### Connection Methods

Socket Weld • Threaded

## Applications

### Suitable Industries

- Petroleum
- Pharmaceutical
- Electrical
- Shipbuilding
- Chemical
- HVAC&R
