

# Forged Fixed Flange for Crane Applications

This large diameter forged fixed flange is specifically designed for crane applications. It provides a secure and reliable connection point, offering exceptional strength and durability under demanding operational conditions.

## Product Overview

### Forged Fixed Flange for Crane Systems

This large-diameter forged fixed flange is engineered specifically for demanding crane applications. Constructed from high-quality forged material, it provides exceptional strength and durability under heavy-duty operational conditions. The robust design includes precisely machined bolt holes to ensure accurate installation and reliable structural support.

## Technical Capabilities

### Manufacturing Capacity

<b>9000 mm</b> Max Outer Diameter	<b>40 tons</b> Max Weight	<b>800 mm</b> Max Thickness	<b>1500 mm</b> Max Height
--------------------------------------	------------------------------	--------------------------------	------------------------------

<b>Outer Diameter Range</b>	700 mm to 9000 mm
-----------------------------	-------------------

## Design Features

### Construction Features

Forged Material • Seamless Rolled Ring • Machined Bolt Holes

<b>Flange Type</b>	Fixed
<b>Primary Applications</b>	Crane Systems, Heavy-duty Lifting, Structural Support
