

Forged Steel Axe Head for Wood Splitting

This axe head is made of forged steel and has a polished cutting edge. It is designed for splitting wood and other heavy-duty tasks.

Product Overview

Heavy-Duty Forged Steel Axe Head

This forged steel axe head is engineered for demanding wood splitting tasks and heavy-duty outdoor work. It features a precision-polished cutting edge for efficient performance and a durable black protective finish to resist corrosion. Designed with a standard eye for secure handle insertion, this component offers reliability and strength for professional forestry or landscaping applications.

Technical Details

Finish

Polished Cutting Edge • Black Protective Finish

Material

Forged Steel

Application

Primary Use

Wood Splitting, Heavy-Duty Tasks

Design

Design Features

- Forged construction for durability
- Optimized geometry for splitting
- Standard eye for handle mounting
