

# Forged Steel Ball Pein Hammer

This ball pein hammer is made from forged steel for strength and durability. It features a shock-absorbing handle for comfort and control during metal shaping, riveting, and striking.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade Forged Ball Pein Hammer

This one-piece forged steel ball pein hammer is engineered for maximum durability and longevity in demanding professional environments. Designed with a shock-absorbing, ergonomic handle, it provides superior comfort and control for extended use. It is an essential tool for automotive professionals, maintenance technicians, and metalworkers requiring reliable performance for shaping, riveting, and striking tasks.

## Technical Specifications

### Head Weight

**16 oz**  
Weight

### Construction

One-piece forged steel

### Handle Features

Anti-vibration, Ergonomic, Non-slip grip

## Applications & Usage

### Target Industries

- Automotive
- Aviation
- Maintenance & Repair
- Iron Work
- Oil & Gas
- Heavy Machinery

### Primary Applications

- Metal shaping
- Riveting
- Striking punches
- Striking chisels
- Rounding edges of metal pins
