

# Forged Steel G Clamp

This heavy-duty forged G clamp is suitable for woodworking, metalworking, and general clamping applications. It features a robust frame that provides high clamping force and durability.

### ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Forged G Clamp

This heavy-duty forged G clamp is engineered for demanding woodworking, metalworking, and general clamping applications. Its robust frame construction ensures high clamping force and long-term durability under pressure. The integrated precision screw mechanism allows for accurate pressure adjustment, making it an essential tool for securing workpieces during gluing, welding, or assembly tasks.

## Technical Details

### Key Features

- Robust frame for high clamping force
- Precision screw mechanism
- Durable forged steel construction

Construction Method	Forged steel
Primary Applications	Woodworking, Metalworking, Welding, Gluing, Assembly
