

# Forged Steel Manure Fork with Four Tines

This manure fork is made from forged steel for strength and durability. It features four tines and an ergonomic design for comfortable use when handling heavy materials.

## Product Overview

### Heavy-Duty Agricultural Handling

This robust manure fork is precision-crafted from high-quality forged steel, engineered specifically for the demanding tasks of agricultural material handling. Featuring four durable tines, it provides the structural integrity required for moving manure and heavy farm debris. The ergonomic design focuses on user comfort, effectively reducing physical strain during extended periods of operation.

## Technical Specifications

### Application

- Manure handling
- Agricultural material handling
- Heavy-duty farm work

Number of Tines	4
Material	Forged Steel
Key Features	Forged Steel Construction, Ergonomic Design, Heavy-Duty, Agricultural Grade
