

Forged Steel Pick Mattock Head

This forged steel pick mattock head features a pointed pick end and a chisel end. It is designed for breaking up hard soil, rocks, and concrete, as well as digging and prying.

Product Overview

Professional Grade Mattock Head

This forged steel pick mattock head is a versatile tool engineered for demanding tasks in gardening, landscaping, construction, and demolition. Featuring a dual-head design with a pointed pick end for breaking hard soil, rocks, and concrete, and a chisel end for efficient digging and prying. Constructed from durable, heat-treated steel, this head ensures long-lasting performance and superior resistance to wear and tear.
