Product Overview

Professional Grade Forged Pickaxe

This forged steel pickaxe is engineered for heavy-duty landscaping, gardening, and construction tasks. Featuring a versatile design with a chisel blade on one end and a pointed pick on the other, it excels at breaking up hard soil, rocks, and compacted earth. The tool is available in various weight configurations and can be supplied as a head-only unit or paired with either a wooden or welded steel pipe handle to suit your specific operational needs.
