

Forged Steel Pickaxe with Pointed and Flat Head

This pickaxe features a forged steel head with a pointed pick end and a broad flat blade. It is suited for breaking rocks, concrete, and other tough surfaces in construction, landscaping, and mining.

Product Overview

Professional Grade Forged Steel Pickaxe

This heavy-duty pickaxe is engineered for demanding tasks in construction, landscaping, and mining. Featuring a robust forged steel head, it is designed to withstand intense impact when breaking through hard surfaces like rocks and concrete. The dual-purpose design includes a pointed pick for piercing and a flat blade for prying, offering versatility for various professional site applications.

Technical Specifications

Key Features
