

# Forged Steel Pointed Bricklaying Trowel

This forged steel pointed bricklaying trowel is designed for applying and shaping mortar or cement. Its pointed shape allows for precise application in tight spaces, while the wooden handle ensures a secure grip and reduces hand fatigue.

## Product Overview

### Professional Bricklaying Precision

This forged steel pointed bricklaying trowel is engineered for professional-grade mortar application and masonry shaping. The high-durability forged steel blade ensures long-term performance, while the ergonomic wooden handle provides a comfortable, secure grip for extended use. Its specialized pointed profile allows for precise mortar placement and efficient spreading, even in confined or complex work areas.

## Technical Details

### Manufacturing Method

Forging

### Blade Material

Forged Steel

### Model ID

FBT-0305

## Features

### Key Advantages

- Durable forged steel construction for longevity
- Ergonomic wooden handle reduces hand fatigue
- Pointed blade design for access to tight spaces
- Suitable for both professional contractors and DIY use

### Best For

Bricklaying, Masonry, Cement Shaping, Mortar Application
