

Forged Steel Tower Pincers for Wire and Nail Work

These tower pincers are designed for gripping, twisting, and cutting wires and nails. They are made from durable forged steel and feature hardened cutting edges.

Product Overview

Professional Grade Tower Pincers

These forged steel tower pincers are engineered for heavy-duty gripping, twisting, and cutting of wires and nails. Designed for maximum durability, the tool features hardened cutting edges that ensure clean performance even after extensive use. The ergonomic handle design minimizes hand fatigue, making it a reliable solution for demanding professional applications.

Technical Specifications

Material	Forged steel
Tool Length	160 mm
