

Forstner Bit

High-speed steel Forstner bits create clean, flat-bottomed holes in wood. They are available in various sizes, including 15mm and 35mm.

Product Overview

Precision Woodworking Performance

This Forstner bit is engineered for high-precision drilling tasks in a variety of wood materials. Constructed from durable high carbon steel (60#), it ensures clean, flat-bottomed holes essential for professional woodworking projects. It is an ideal choice for cabinet making, furniture assembly, and general carpentry.
