

Four-Bay AA/AAA Battery Charger

This four-bay battery charger is designed to efficiently charge AA and AAA Ni-MH or Ni-Cd rechargeable batteries. It features individual charging channels, allowing for simultaneous charging of different battery sizes and capacities.

Overview

Versatile Four-Bay Charging Solution

This efficient four-bay battery charger is engineered to handle both AA and AAA Ni-MH and Ni-Cd rechargeable batteries simultaneously. With independent charging channels for each bay, it offers flexibility for mixed-capacity charging needs. Designed for safety and reliability, the unit includes built-in overcharge and short-circuit protection, making it an ideal power management tool for home or professional office environments.

Technical Specifications

Supported Battery Chemistries	Ni-MH, Ni-Cd
Compatible Sizes	AA, AAA
Charging Channels	4 channels

Features & Safety

Safety Protections

- Overcharge protection
- Short circuit prevention

Status Indicators

LED Charging Indicators

Usage

Power Source	AC Adapter
Best For	Home and Office
