Product Overview

Compact Performance

This four-burner table top gas stove is engineered for efficiency and convenience in professional or compact kitchen environments. Featuring a durable stainless steel cooktop and an integrated hinged glass lid, it offers a robust solution that is easy to maintain and clean. The design prioritizes optimal combustion and even heat distribution to ensure consistent results across all four burners.

Technical Specifications

Number of Burners	4
Burner Style	Circular burner design for optimal combustion
Inlet Configuration	Upper inlet design
Safety Features	Gas leakage protection, Hinged lid, Precise heat control

Build Quality

Material Composition

- Stainless steel cooktop
- Protective glass lid
