

Four-Color Offset Printing Press

This four-color offset printing press is designed for high-volume printing. It utilizes multiple printing units for simultaneous color application, enhancing production speed and reducing turnaround time.

Overview

High-Efficiency Four-Color Offset Press

This four-color unit-type offset press is engineered for high-volume printing environments, delivering consistent quality and precision. Featuring a series of dedicated printing units, it enables simultaneous multi-color application, significantly increasing production speed and reducing turnaround times. The system incorporates an automated paper feeding mechanism and advanced inking controls, all managed via an intuitive computer interface for streamlined job setup and monitoring.

Technical Specifications

Printing Configuration	Unit-type, 4-color
Automation Features	Automated paper feeding, Precise registration control, Advanced inking mechanism, Computerized interface

Applications

Suitable Applications

- Brochures
- Magazines
- Packaging materials
