

Four-Cylinder Diesel Engine

The ZH4100G is a robust diesel engine designed for various industrial applications. It features a four-cylinder configuration, delivering reliable power and efficient performance.

Overview

Robust Industrial Performance

The ZH4100G is a high-performance four-cylinder diesel engine engineered for durability and consistent operation in demanding industrial environments. It features an advanced high-pressure fuel injection system that ensures optimized combustion and overall efficiency. Designed with a water-cooled system and a heavy-duty crankshaft, this unit provides exceptional longevity with minimal maintenance requirements for generators and construction machinery.

Technical Specifications

Key Components

- High-pressure fuel injection system
- Heavy-duty crankshaft

Configuration	Four-cylinder diesel
Cooling System	Water-cooled

Application Suitability

Suitable Applications	Generators, Construction Equipment, Industrial Machinery
