

# Four-Cylinder Diesel Engine

The R4108L is a robust diesel engine designed for various industrial applications. This engine features a four-cylinder configuration, providing a balance of power and efficiency.

## Product Overview

### Industrial Performance

The R4108L is a robust four-cylinder diesel engine engineered for reliability and durability in demanding environments. It features direct fuel injection for optimized combustion efficiency and a high-capacity cooling system to maintain stability. Designed for versatility, this engine is an ideal power source for generators, construction equipment, and agricultural machinery.

## Technical Specifications

Cylinder Count	4
Fuel System	Direct Fuel Injection

## Performance Features

Notable Features	Direct Injection, High-capacity Cooling, Heavy-duty Filtration, Industrial Grade
------------------	--

## Applications

### Industry Suitability

- Power Generators
- Construction Machinery
- Agricultural Equipment
