

Four-Cylinder Diesel Engine

This four-cylinder diesel engine balances power and efficiency for varied uses. Advanced combustion technology reduces emissions and improves fuel economy.

Overview

Industrial Four-Cylinder Diesel Engine

The R4105T15-1 is a robust four-cylinder diesel engine engineered for versatility and consistent performance in demanding industrial environments. It integrates advanced combustion technology to optimize fuel economy and minimize environmental impact. Designed with durability in mind, it provides reliable operation for agricultural, construction, and power generation sectors.

Technical Specifications

Performance Metrics

4.1 L Displacement	40 HP Minimum Power	60 HP Maximum Power
------------------------------	-------------------------------	-------------------------------

Engine Configuration	4-Cylinder
-----------------------------	------------

Key Features

Operational Benefits

- Advanced combustion technology
- Reliable fuel injection system
- Durable integrated cooling system
- Designed for longevity and easy maintenance

Suitable Applications	Agricultural Machinery, Construction Equipment, Power Generation
------------------------------	--
