

Four-Fan Electric Air Circulator

This electric fan unit features four individual fans arranged in a square configuration. The stand is adjustable and includes a remote control.

Overview

High-Efficiency Four-Fan Air Circulator

This advanced air circulation unit features a unique four-fan configuration designed to maximize airflow and coverage in professional environments. Mounted on a sturdy, adjustable gray stand with a stable circular base, it offers versatile positioning for optimal cooling. The included remote control provides convenient operation, making it an ideal solution for maintaining comfortable temperatures in offices, workshops, or commercial spaces.
