

Four-Flute Green-Painted Drill Bit

This drill bit features a four-flute design at the cutting end. The green paint finish provides corrosion resistance.

Product Overview

High-Performance Four-Flute Drill Bit

This green-painted drill bit is engineered for heavy-duty drilling applications across a variety of materials. Featuring a robust four-flute design at the cutting end, it ensures efficient material removal and stable operation. The cylindrical shank includes machined flats to provide a secure grip in tool holders, while the specialized paint finish offers enhanced corrosion resistance for long-lasting performance.

Design & Construction

Flute Configuration

4 qty

Flute Count

Surface Treatment

Green Painted • Corrosion Resistant

Technical Features

Intended Use

- Heavy-duty drilling
- Multi-material operations
- Industrial machining

Shank Design

Cylindrical with machined flats for secure gripping

Chip Removal

Central bore at the cutting end facilitates efficient chip evacuation
