

Four-Gang Two-Way Light Switch with Wide Rocker

This four-gang, two-way light switch features a thin cover plate and wide rocker switches. The switches are constructed from high polymer PC with glass fiber and PA nylon for wear, discoloration, fire, and chemical resistance.

Product Overview

Modern Lighting Control

This four-gang, two-way light switch features a sleek, screwless design with wide rockers, offering a clean and aesthetically pleasing look for any interior. Engineered for efficiency, the compact mechanism allows for space-saving installation and fast, convenient wiring. With its slim profile and versatile finish options, it is an ideal solution for upscale environments including hotels, studios, cafes, and modern office spaces.
