

Four-Lamp Halogen Bathroom Heater

This bathroom heater features four halogen lamps for efficient heating. It is designed for ceiling mounting and includes a ventilation component.

Overview

Efficient Multi-Function Bathroom Heating

This four-lamp halogen bathroom heater provides a comprehensive solution for climate control and ventilation in residential or commercial bathrooms. Designed for ceiling installation, it integrates heating, lighting, and ventilation into a single, cohesive unit. With a powerful 1179W output, it is optimized to maintain comfort in spaces ranging from 10 to 20 square meters.
