

Four-Leg Alloy Steel Chain Sling with Safety Hooks

This four-leg chain sling is designed for heavy lifting applications. It features high-strength alloy steel chains connected to a master link at the top and individual hooks at each leg's end.

Product Overview

Heavy-Duty Lifting Solution

This four-leg chain sling is engineered for demanding heavy lifting applications in industrial and construction environments. It features high-strength alloy steel chains connected to a central master link, ensuring stability and security during operation. Equipped with safety-latch hooks on each leg, the design prevents accidental disengagement, providing reliable performance for complex lifting configurations.

Technical Specifications

Configuration	Four-Leg
Material	Alloy Steel
Safety Features	Safety Latches, Load Indicators, High-Visibility Components
