

# Four-Outlet Water Tap Connector

This four-outlet water tap connector splits a single water source into four independently controlled outlets. Each outlet features a dedicated on/off lever, providing precise control over water flow to individual zones.

## Overview

### Deluxe 4-Way Irrigation Solution

The Deluxe 4-Way Tap Adaptor is a versatile gardening tool designed to split a single water source into four independently controlled outlets. This adaptor allows for simultaneous connection of multiple hoses or watering devices, enhancing efficiency in garden irrigation and maintenance. Each outlet features a dedicated on/off lever, providing precise control over water flow to individual zones, while the durable construction ensures long-lasting performance against outdoor elements.

## Technical Design

### Connection Features

- Adjustable direction in lock state
- Leak-proof nut connection mode
- Compatible with standard tap sizes
- Secure, leak-free operation

### Control Mechanism

Gate knife clutch with push and pull mode to control inlet water

## Performance

### Key Performance Metrics

**4 qty**

Independent Outlets

## Application
