

Four-Slice Stainless Steel Toaster with Independent Controls

This four-slice toaster is constructed with a durable stainless steel exterior. It features dual controls, each operating two slots independently, with browning level dials and defrost, reheat, and cancel buttons.

Product Overview

Professional Four-Slice Toaster

This durable stainless steel four-slice toaster is designed for high-efficiency environments. It features independent controls for each pair of slots, allowing users to customize browning levels simultaneously for different preferences. With added defrost and reheat functionality, it provides a versatile solution for busy breakfast service settings.
