

Four-Slot Battery Charger

This battery charger features four slots for simultaneous charging. It is designed with ventilation and indicator lights for efficient battery management.

Overview

Professional Four-Slot Charger

This high-efficiency battery charger features four dedicated charging slots, designed to support simultaneous charging for increased productivity. Its robust construction includes a ventilated design with horizontal and triangular slots to ensure optimal thermal management during operation. Equipped with intuitive side and top controls, this device provides a reliable power solution for professional environments requiring consistent battery maintenance.

Technical Specifications

Charging Slots	4 slots
Cooling System	Ventilated Design, Thermal Management Slots
Status Indicators	Yes

Design & Build

Controls

- Cylindrical side buttons
- Top operation button

Construction	Durable materials with metallic finish
